

FOR IMMEDIATE RELEASE

MedTech Adds New Industry Leaders to Board of Directors

SYRACUSE, N.Y. (November 8, 2022) - MedTech Association, a membership-based trade association for the bioscience and medical technology (Bio/Med) industry in New York State, has recently welcomed five highly-qualified community and industry leaders to its 2022-2023 board of directors. MedTech appreciates the distinguished efforts of its Board and looks forward to advancing the organization's mission with the addition of these new directors. For a complete listing of MedTech directors, visit <http://www.medtech.org/about/board-of-directors>.

Michelle Bonn
CEO, Compliance Team

Michelle's career has involved leading life science consulting firms and international, technical teams across the US, Asia and Europe. She is well versed in compliance regulations for the pharmaceutical, cannabis and medical device industries. She has led ISO certifications, manufacturing risk assessments, manufacturing facility audits to GMP standards, FDA regulatory clearances, and Health Canada License registrations. In 2020, she acquired Compliance Team to blend FDA regulatory affairs services from her first company, Guideline Medical, with specialized, FDA Engineering, Compliance services of Compliance Team. Here, she leads the company's strategic direction and vision. She ensures the team is executing on corporate plans, expanding cannabis service offerings, and maintaining a dynamic and effective work culture.

Bryan Greene
COO, Quadrant Biosciences

Bryan Greene is the Co-Chief Executive Officer of Quadrant Laboratories and the Chief Operating Officer of Quadrant Biosciences, a life sciences company dedicated to improving the lives of children and families by delivering innovative diagnostic, therapeutic, and virtual care solutions for global health priorities. He graduated with distinction from Clarkson University with a BS in Chemical Engineering. He has more than 15 years of experience in medical device operations, manufacturing, validation and new-product introduction at both large multinational and start-up corporations. Greene has a demonstrated work history in operations and engineering, including successfully introducing Class I, II and III products at Life Technologies (Thermo Fisher Scientific), Pall Corporation and ImClone System (Eli Lilly). Prior to joining Quadrant, Bryan was the manufacturing and operations leader during the establishment and implementation of an FDA 21CFR820-compliant system at Rheonix, a medical device start-up.

Jamey Hoose

Director, Shipley Center for Innovation at Clarkson University

Jamey Hoose joined the Shipley Center for Innovation in October 2015 and brings a diverse set of experiences in entrepreneurship and collegiate administration to the Center. In his role as Director Jamey helps to support the mission of the Center as it guides Clarkson University students and faculty, as well as regional entrepreneurs, through the process of commercializing their innovations. He and his team provide support in relevant areas such as patent prosecution, market analysis, product development and commercialization strategy. Jamey spent nearly ten-years as an entrepreneur before taking on his first administrative role at SUNY Potsdam in 2007, and he has continued to serve in administrative positions at both SUNY Potsdam and Clarkson University since that time, culminating in his current role which combines his passion for entrepreneurship, innovation and administration. Jamey attended Clarkson where he earned a bachelor's degree in Business Administration as well as his MBA. In 2020 Jamey earned a JD from Albany Law School with a concentration in Intellectual Property.

Michelle McGrath

Sr. Marketing Manager, Baxter

Michelle McGrath is the senior manager of marketing operations at Baxter, one of the world's leading medical technology companies. She has nearly 25 years of healthcare experience, starting with Welch Allyn and then Hillrom before its acquisition by Baxter in 2015. Her marketing experience spans communications, new product development, regional marketing, and marketing process development. In her roles, she has traveled the globe visiting healthcare institutions and meeting with distribution and manufacturer partners. She has worked closely on the regulatory side of the business, as well as with R&D, quality, and legal. Michelle is also co-president of the Alliance for Baxter Women, the company's largest Business Resource Group. With Welch Allyn, she oversaw the company's Corporate Social Responsibility committee for several years and has recently been appointed Baxter's community engagement site ambassador for Skaneateles, NY. She is on the St. Joseph's Health Foundation Board of Directors and chairs its Board Governance Committee. Michelle has a bachelor's degree in journalism and an

MBA in marketing and organizational management from Syracuse University.

Christopher Neville

Director of Industry Research & Innovation / Professor, Upstate Medical University

Dr. Neville is director of the Motion Analysis Laboratory where he completes research with the Department of Orthopedic Surgery, Department of Neuroscience, and the Upstate Concussion Center, along with his primary appointment in the Department of Physical Therapy Education. Dr. Neville has worked extensively with various industry partners across a range of research activities. These industry collaborations have spanned from consulting, device design and validation, equity partnerships, strategic development, and product design. Dr. Neville is pas-president of the Foot and Ankle Special Interest group (FASIG) within the Academy of Orthopedic Physical Therapy providing oversight for the national membership of 700 and voice on the board for an organization of over 20K members. Dr. Neville has participated, and led, strategic planning for groups and organizations ranging from 10 to 700 people. He has over 50 peer-reviewed publications leading to numerous national and international presentations and a history of NIH, industry, and private funding supporting his ongoing research.
