

## MedTech**IDEAS** Conference Series

**MedTech**IDEAS**** (*Innovate/Design/Educate/Advocate/Synergize*) is our signature conference series that tackles today's big challenges in bio/med with insights from top industry innovators and thinkers. These one-day programs attract business and academic leaders from across New York who come to connect with peers, share best practices, and explore collaboration and business development opportunities.

The conferences are held at locations around the state, often at the facilities of MedTech sustaining members. Available sponsorship opportunities allow organizations to showcase their products or services and to demonstrate their support of New York's bio/med industry.
